

Bolton Notch Focus Area "Bolton Crossroads"

The improvement concept for Bolton Crossroads provides a small network of local streets and low-speed boulevard improvements to Route 6 that will accommodate and support the community's long-term vision for a pedestrian and bicycle-friendly mixed-use village located just east of Bolton Ice Palace and Munson's Chocolates. This concept also includes a new street connection between Route 6 and Route 44 that will accommodate access for additional development opportunities. This concept could also incorporate access management measures and speed mitigation measures to promote safety, and streetscape improvements to create a gateway to the Hop River Corridor for all users.

Potential Development Concept from REDC's Land Use Study
